## CHOICE COATED SHEET

### Standard Line

The Choice Coated Sheet is manufactured from 100% recycled materials made in North America. The Choice Coated Sheet is a paperboard sheet that has a solid off-white coating that protects it from environmental damage while in transit. Though this sheet is not recommended for printing, it is especially useful for shipments that require a range of light – heavy-duty protection. **Here are some common applications where choice coated sheets are used: pharmaceuticals, food packaging, furniture, automotive parts, and bagged products.**

### QUICK EXPLANATION:

Full whitish coating – not print quality  
Type of board can be specified as to CCNB or CCKB  
.013"-.150" in caliper

+/- .003" for calipers .013"-.030 "  
+/- .005 for calipers .031"-.150"  
Mill trim grain optional sheet unless specified differently.
